

OH&S Training

COURSE CONTENT

This course includes both theory and practical components that will give the participants the confidence and skills to identify and implement measures to eliminate health, safety and operational risks within your business.

Because all workplaces are different some content within the training program will be tailored to your specific needs.

ELEMENTS OF COMPETENCY

- a) Induction safety information
- b) What is OH&S and why is it important
- c) Employer & employee obligations
- d) Understand the importance and significance of workplace risk assessments
- e) How to undertake a workplace risk assessment and identify workplace risks
- f) Management of risk and implementing steps to mitigate
- g) Benefits and use of PPE and other safety equipment and procedures
- h) Reporting and managing workplace risks

COURSE DURATION

Full Day (8 hours).

PARTICIPANTS

Min 10 Max 20.

DESIGNED FOR

All individuals regardless of employment status who may be required to manage your OH&S obligations.

PRE-REQUISITES

None.

ASSESSMENT

Participants will demonstrate knowledge of the elements of competency during class based training.

Confirmation of their underpinning knowledge is also gathered through demonstrating skills during practical exercises.

CERTIFICATION

Upon successful completion of the course, participants will be issued with a CAM FIRESAFE certificate.

QUALITY ASSURANCE

This FIRESAFE CAMBODIA course is designed using international best practice principles, which are in line with those used in countries such as Australia.

DELIVERY METHOD

Classroom based and practical training consisting of presentations, case studies and training focusing on workplace safety concepts.

The course is delivered by suitably experienced and qualified trainers, who have years of hands on experience in their field.
