

Off Road Driver Training

COURSE CONTENT

The course aims to provide full time drivers the additional skills required to ensure they can competently operate a 4 wheel drive vehicle in a professional manner in any situation, ensuring the safety of the passengers and the protection of organisational assets. The course will contain both theory and practical training.

Participants will after completing this course have a greater awareness of how to drive a 4 wheel drive vehicle in a safe manner, understand the limitations of the vehicle and how to correctly drive the vehicle in various terrains to protect themselves, their passengers and the organisational assets

ELEMENTS OF COMPETENCY

- a) Vehicle design and functionality
- b) Safety concepts
- c) Understanding different terrain
- d) Vehicle limitations
- e) Negotiating steep slopes and rugged terrain – ascending and descending
- f) Emergency procedures – stop/stall and restart on slopes
- g) Introduction to recovery equipment
- h) Correct use of the four-wheel drive transmission
- i) Limitations of 4WD/4WD vehicles
- j) Analysing terrain, surfaces and hazards
- k) Environment and vehicle synergy

COURSE DURATION

Two Consecutive Full Days (16 hours).

PARTICIPANTS

Min 10 Max 14.

DESIGNED FOR

Participants who as part of their normal job routine are required to drive company 4 wheel drive vehicles in situations where they may be required to go off road.

PRE-REQUISITES

Current Cambodian driving licence.
Advanced Defensive Driver training.

ASSESSMENT

Participants will demonstrate knowledge of the elements of competency during classroom presentations and simulation-based exercises.

Confirmation of their underpinning knowledge is also gathered through demonstrating skills during practical driving exercises and drills.

CERTIFICATION

Upon successful completion of the course, participants will be issued with a CAM FIRESAFE certificate.

QUALITY ASSURANCE

This course is designed using international best practice principles, which are in line with those used in countries such as Australia.

DELIVERY METHOD

Classroom based and practical training consisting of presentations, case studies and training exercises focusing on vehicle dynamics, driver awareness and driving skills in various terrains.

The course is delivered by suitably experienced and qualified trainers, who have years of hands on experience
